Hi Amber,

Harry and I were very impressed with the USFS and DEQ presentations last week. We have 2 comments. First, we think that it is definitely worth looking into building a haul road to Section 35 and we are very interested to know why more research was not done on the Horsefly Creek option and if there was, why it was not better delineated at the meeting. We came away thinking that Horsefly might be the best option as there seemed to be fewer human and conservation concerns.

Harry and I spend a lot of time trying to protect and improve the Blackfoot watershed for its cultural, scenic and, of course fishing attributes which are so important to us in the middle Blackfoot. Harry has been on the Big Blackfoot TU and Blackfoot Challenge Boards for years and I am in my second term on the Board of the Clark Fork Coalition. We also care deeply about the concerns of the Lincoln residents who will be so intimately affected by this huge project. We want the best outcome for residents, tourists and the watershed and feel that they should be considered more important than the cost.

Thanks for all the work that you are doing,

Cindy Poett
